

many feel that Teacher quality and teaching style greatly affect their experience (both good and bad) w/ the class

The teacher	Teacher	Teacher	the teacher and how well they teach	the teacher's teaching style	The teaching style	Teacher	teacher	The teachers teaching the course.	I thought English 10 honors would be bad, but I got a A and had an amazing time because the teacher was so good.	yes, usually because of good teacher even if the subject itself is mediocre	YAAAAAASSS. AP/CP was harder than expected 1st quarter. English can vary depending on teacher, and sometimes you just sign up for a class to fill time and its awesome	I honestly thought I would hate Calc AB because I have to work really hard to get an A- , but currently the class is going very well, and the material is broken up into coherent sections and its into each other. I think it really depends on the teacher and who you end up in a class with it. Because if the teacher sucks and the people in your class are too smart, then if you don't understand, you're kinda cooked.	Yes, because the teachers teaching the subject have varying difficulty, so I can either have it especially easy or especially hard
